

SAIM IFTIKHAR

AI/ML Engineer

+92 3276931150 saimiftikhar.work@gmail.com

ABOUT ME

Detail-oriented and enthusiastic Computer Science undergraduate (BS, AI track) with strong foundations in object-oriented programming, data structures, and machine learning algorithms. Skilled in Python, Java, and data preprocessing with hands-on experience in AI model development, software projects, and community leadership. Actively exploring deep learning and real-time AI applications.

EDUCATION

Bachelor of Science in Artificial Intelligence

Barani Institute of Information Technology (BIIT) • Rawalpindi, Pakistan

2023 - 2027

- Maintained a **CGPA of 3.97/4.00** with **consistent academic excellence**.
- Specialized in **AI, ML**, and **Software Development**
- Relevant Coursework: **Data Structures & Algorithms, Machine Learning, Artificial Intelligence, Object-Oriented Programming (Java), Operating Systems, Human-Computer Interaction.**

PROJECTS

- **Credit Card Fraud Detection** (real-world finance application)
- **Plant Disease Detection** (CNN)
- **AI Chatbot** with RAG (cutting-edge, LLM-based)
- **ASL to Speech Converter** (social impact, real-time AI)
- **Emotion Detection AI** (interactive, good GUI work)

EXPERIENCE

Community Manager: BIIT Artificial Intelligence Society (April 2025)

- Passionate about connecting minds through technology and innovation. As the Community Manager of the AI Society, I focus on building a strong student network, promoting AI learning initiatives, and creating opportunities for collaboration and growth within the tech community.

Social Media Manager: BIIT Artificial Intelligence Society (April 2025)

Barani Institute of Information Technology(BIIT): Teaching Assistant

October 2024 - January 2025 (4 months)

SKILLS

Programming: Java, Python, C++, SQL

AI & ML: Scikit-learn, Pandas, NumPy, TensorFlow (basics), OpenCV

Soft Skills: Communication, Teamwork, Leadership, Time Management

Web: HTML, CSS, JavaScript (basic)

CS Fundamentals: Data Structures & Algorithms, OOP, Problem Solving

Tools: Git, GitHub, Jupyter Notebook, Google Colab, MySQL, VS Code
